

Mixing Cups & Containers

The choice of container is often a key factor in obtaining good mixing results. The shape and volume of the container are very important parameters. A container that is too empty or too full are very common errors that cause unnecessary waste of time. Hauschild offers a wide range of containers for all needs. Above all, with fifty years of experience, no one can help you better than our technicians in selecting the mixer container.

The most common mixing container are polypropylene jars, suitable for most of the applications due to the low chemical reactivity and good heat resistance.

The polypropylene containers usually go from few ml. up to:

- 2 liters (0,53 gal / 67,63 oz) for the Hauschild SpeedMixer DAC M-Series
- 2.8 liters (0,74 gal / 94,7 oz) for the Hauschild SpeedMixer SMART DAC Series
- 3.8 liters (1.0 gal / 128,5 oz) for the Hauschild SpeedMixer SMART DAC High Volume Series

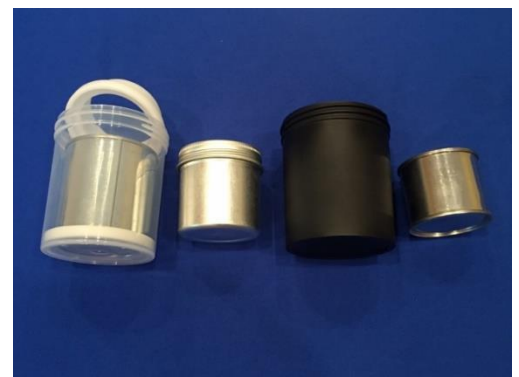

PTFE, glass and metal containers such as: tin cans, aluminum, stainless steel and others are also available.

For energetic material conductive containers are available in combination with special type of SpeedMixer[™].

Black cups are also available for photosensitive materials.

Cartridges and syringes can also use in the Hauschild SpeedMixer.

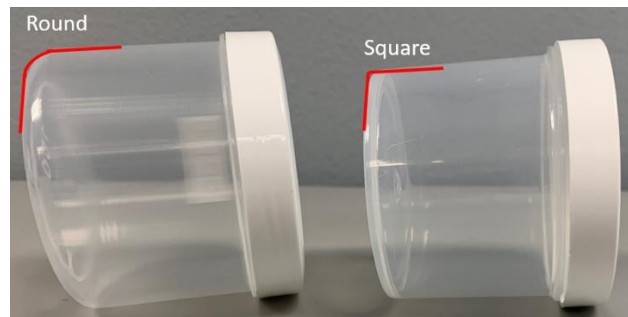

The most utilized are the PP Cups and the Max Cups. The PP cups are produced in Europe while the Max Cups are produced in the USA. Both are available in a wide range of sizes and colors.

The main difference is the bottom corner: in the PP Cup the corner has a radius while the Max Cup has a sharp corner.

The round corner is generally better, especially with medium-high viscosity material and with powders.

The sharp corner tends to make the material get stuck at the bottom.

Hauschild also offers different types of seals to ensure the seals for the lids made of

List of the most common PP cups

* Sold by Hauschild SpeedMixer Inc. (info.us@hauschild-speedmixer.com)

The Max Cups are offered by Hauschild SpeedMixer Inc., our exclusive distributor in the USA. For more information, please write to info.us@hauschild-speedmixer.com.

Large buckets

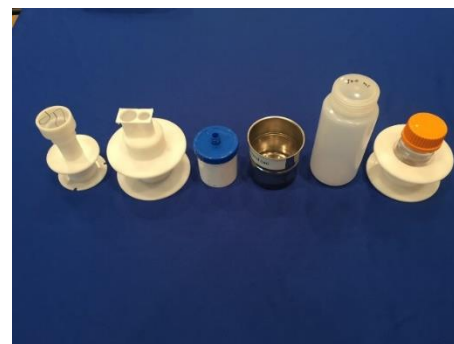

For the Hauschild SpeedMixer L-Series that can mix up to 2x15 kg/2x33 lb, larger buckets are available from 6 liters/1,59 gal., 9 liters/2,64 gal., 15 liters/3,96 gal. and up to 19 liters/5 gal.

Depending on your location, we can help you find the best compromise quality/volume/price.

Others

Mixing in cartridges and syringes is also possible with the Hauschild SpeedMixer. Especially the new generation SMART DAC, with the variable counterrotation, can generate more shearing force and obtain great results also in small containers.
